Professional Summary

M.S. Information Technology Management candidate (Tulane, May 2026). Full-stack developer and cross-functional operator with a software engineering foundation and hands-on experience delivering client-facing systems across legacy modernization, workflow digitization, cloud data analytics, and enterprise application architecture. Equally comfortable deep in a codebase or in a room with stakeholders - translating ambiguous problems into practical solutions and shipping them.

Employment History

Vernon LLC - Kansas City, MO

Developer | Aug 2025 - Present

- Build and deploy manufacturing process digitization tools and custom client automations for a 4-person startup serving industrial clients.
- Engineer lightweight tools and automations that eliminate manual steps, improve traceability, and directly reduce operational overhead for clients.
- Own the full requirements-to-delivery cycle: gather stakeholder requirements, scope solutions, and ship improvements in tight iteration loops.

Beyond79 - Leawood, KS

Contracted Developer | Nov 2024 - Present

- Modernized a legacy PHP 5.x codebase to PHP 8 by refactoring deprecated components, improving maintainability, and reducing runtime issues.
- Updated backend structures (including schemas where needed) and shipped UI/UX improvements aligned with usability and discoverability (SEO).
- Conducted performance profiling to identify bottlenecks and optimize backend processes for faster, more reliable application behavior.

DataMap LLC - Leawood, KS

Technical Intern | Jun 2023 - Dec 2023

- Led design, development, and client demo of a Coupa-integrated guided buying application to streamline employee procurement and payment workflows.
- Contributed to sales enablement by presenting the product demo and supporting a key development deal.
- Executed test scripts for release updates to validate functionality and performance across client environments.

Shipment Unloader - Kansas City, MO

Midland Industries | June - Aug (2019 - 2021)

- Followed processing operations for large shipments
- Managed the sorting of stock within the warehouse.

Education

Tulane University - New Orleans, LA

M.S. Information Technology Management | Aug 2024 - May 2026 (Expected)

Graduate Certificate: Data Science & Cloud • GPA: 3.832/4.0

Relevant Areas: Cloud Data Analytics, Enterprise Application Architecture, Cybersecurity & Risk Management, IT Governance & Policy, IT Project Management

Louisiana State University - Baton Rouge, LA

B.S. Computer Science (Software Engineering) | Aug 2020 - May 2024

Ogden Honors College, Tau Kappa Epsilon • GPA: 3.3/4.0

Skills

Languages: Python, JavaScript, PHP

Frameworks: Node.js, Laravel, React, React Native

Databases/Backend: MySQL

Tools/Platforms: Git, GitHub, Bitbucket, VS Code, Linux, AWS, Replit, Claude

Enterprise/Integration: Dynamics 365, Boomi, Coupa

Practices: Agile/Scrum, SDLC, UI/UX Design, Data Management, Data Visualization, Machine Learning, Performance Analysis and Optimization, Cloud Application Development, Enterprise Application Architecture, Cybersecurity & Risk Management, IT Governance (COBIT, ITIL), IT Project Management
